Dear Sir,

I am writing to recommend without reservation the services of ESA Bultechnics Company represented By Mr. Ivelin Ivanov.

I first engaged the services of ESA Bultechnics Company in June 2009, and since all of my dealings with the firm have been positive and of great benefit to our company.

ESA Bultechnics Company is exemplary in the field of Controls and Automation. They were able to design a state of the art fully integrated QCS and DCS systems for the complete operation and quality control of our Mill using latest technology software Simatic PCS 7 from Siemens. In fact, I credit our company's successful startup and smooth operations in part to the efforts of ESA Bultechnics Company and its talented representatives, who have managed to complete the job in a very professional manner and most importantly on time.

The ESA Bultechnics Company was also very impressive in finding original solutions to apply their vast experience in automation to our specific application for tissue production. The close working relationships they develop with their clients ensure that they have a very good handle on the specific problems and needs of each client hence allowing them to propose effective real solutions for the various problems.

I am confident that engaging the competent experts at ESA Bultechnics Company is a decision you won't regret. Please don't hesitate to contact us if you would like further insight.

Sincerely,

A handwritten signature in black ink, appearing to read 'Scopov', written in a cursive style with a long, sweeping underline.

President
